

# Gallery Works™

*Because a picture is worth a thousand words...*

**Gallery Works™:** New, innovative database software which is based on recent image library technology. The program enables users to store their collection(s) image(s) including a full description of each item(s). The system provides a simple yet powerful inventory tool to categorize an entire inventory based on item images. User can create an effective and fun image library of his/her entire collection.

**Gallery Works™:** An entire new concept in inventory control. Simple for use, yet smart behind the scene. The software provides an advanced approach in order to easily access each category and its items. User friendly and mainly intuitive.

**Gallery Works™:** Universal & Fully Customizable. Users can customize and personalize their database. You can create unlimited categories, sub-categories and items. The system's capacity is determined only by your hard drive's size.

**Gallery Works™:** Quick description fields enable users to put all of the desired details about an item. Users can import their entire collections' images and then add a full description per image.

**Gallery Works™:** Un-Limited Imaging Library. You may import an un-limited number of images of your items. For better viewing capabilities, we incorporated state of the art imaging technology to provide you with endless viewing possibilities.

**Gallery Works™:** Un-Limited databases. Now you have the freedom to create separate databases for different subjects. Although, you can incorporate them within the categories, this program enables the option to create an entirely separate database for different items. For example: You may create an entirely separate database for Marklin and ROCO trains. Another example: You can create a database named Trains, another database named Scenery and another database named DCC Equipment. This feature creates an entire world of possibilities.

**Gallery Works™:** Advanced backup system, keeps your database safe in the event of system crash or malfunction.

**Gallery Works™:** Highest Security Level. Your database is encrypted for maximum confidentiality.

**Gallery Works™:** Easy Reports. Our Quick and uncomplicated reporting system provides you with clear and immediate representation of your database. One reporting system does it all! Hassle Free!

**Gallery Works™:** Users may Export all images to all other file system locations. (Folders, CD's, other media)

**Gallery Works™:** Advanced Search feature to quickly locate item images.

**Gallery Works™:** The images Slide Show feature enables you to review your entire inventory. Sit back, relax and enjoy the show...

**Gallery Works™:** Advanced internet Live Update feature. Stay up-to-date with new releases, bug fix and new features! A licensed user is eligible for two years of FREE Upgrades! Simply connect to the internet and download the program's recent upgrades.

**Gallery Works™:** Bonus Features! Model Railroading Utilities provide the model railroader with useful tools like Digital and Analog Clocks, a Multi-Purpose Calculator (Includes international converters), System Information (CPU, Memory, Load, Etc.) and more.

**Gallery Works™:** Is aimed for efficient and impressive storage of the image library of your Model Railroading collection!

**Requirements:** MS Windows XP, Pentium Based System, 128 MB RAM, 20 MB HD, SVGA
