The main content area is titled "External Links" and contains three images:

- Top image: A photograph of a Bachmann Spectrum F40PH DP5X model locomotive, number 396, with "Amtrak" branding.
- Middle image: A photograph of the locomotive's internal decoder board with a red arrow pointing to a component. A file path `file:///C:/Temp/bachma3.jpg` is visible at the bottom right of this image.
- Bottom image: Another photograph of the decoder board with a red arrow pointing to a different component.

The software window includes a menu bar (File, Edit, View, Tools, Help), a toolbar, and a status bar at the bottom showing "Terms: 1" and "data".

T.R.A.C.E.™

Train Resource Archive & Categorized Encyclopedia

T.R.A.C.E.™: An innovative, computerized Train Resource Archive and Categorized Encyclopedia written collaboratively by hobbyists. It is the only program that provides you with a complete informational system about the hobby! Based on advanced database technology and hobbyists feedback, we created a personalized knowledge based and information center for model railroading and trains in general.

T.R.A.C.E.™: The **T.R.A.C.E.™** is a **new concept**, open content, community-built encyclopedia with thousands of articles on topics from A to Z (keeping in mind your data base may differ from others depending on the information you choose to share and or download alike.)

T.R.A.C.E.™: is an advanced resource and knowledge base center for model railroaders. The program was specially designed to keep records of model railroading and general information. Furthermore, with **T.R.A.C.E.™** you can store definitions, terms, procedures and any other desired information like Function, Description, etymology, obsolete and up to five (5) images per term to create your own archive and computerized encyclopedia.

T.R.A.C.E.™: Universal & Fully Customizable. Users can customize and personalize their database. You can create unlimited categories, sub-categories and items. The system's capacity is determine only by your hard drive's size.

T.R.A.C.E.™: Every record is stored within the program's browser and can be easily accessed. The software also stores sound files that can played directly from the program. In addition users can up to five (5) images per record to provide graphical enhancement.

T.R.A.C.E.™: includes efficient backup system, keeps your database safe in the event of system crash or malfunction.

T.R.A.C.E.™: One of the advanced features of the program is the capability to **import** and **export** selected records, to be shared with colleagues via the internet. Users are capable of sharing their information with other model railroaders also using **T.R.A.C.E.™** by simply exporting the desired information. This information is available for download through the **T.R.A.C.E.™** web page. **T.R.A.C.E.™** Alerts users about the existence of new information that is available for download. Users may review the available, shared information and add it to their own personal database. In this way the knowledge base system will be growing with the years to become an extensive encyclopedia.

T.R.A.C.E.™: Provides an easy Reporting system. Our Quick and uncomplicated reporting system provides you with clear and immediate representation of your record's database. One reporting system does it all!

T.R.A.C.E.™: Advanced internet **Live Update** feature. Stay up-to-date with new releases, bug fix and new features! A licensed user is eligible for two years of FREE Upgrades! Simply connect to the internet and download the program's recent upgrades.

T.R.A.C.E.™ is user friendly, mainly intuitive, yet advanced behind the scene.

Requirements: MS Windows XP, Vista
